

ETB Concealed Beam Hanger

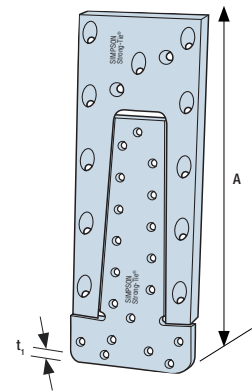

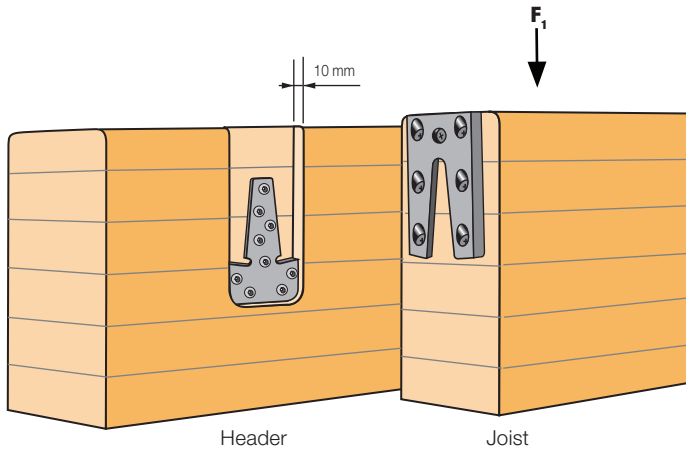

For a concealed connection, the ETB concealed connector comes in two parts. The first is pocketed in the header timber and fixed with nails, while the second part is fitted to the end of the beam with screws. No slots or dowel holes need to be made, speeding up installation time on site.

Material: Joist plate: 10mm aluminium. Header plate: 6mm aluminium

Order nails and screws separately.

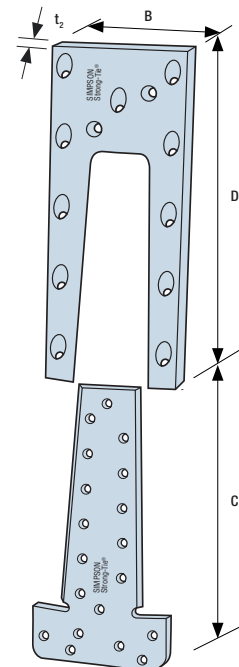

ETB160-B
