

# PRO300 — Quik Drive® Auto-Feed Screw Driving System

## Save Time and Money with Faster Installation Speeds and Consistent Performance

The PRO300 Quik Drive® Auto-Feed Screw Driving System is ideal for underlay, subfloor, cement sheet, weatherboard and decking applications. Designed to drive 40mm–75mm (8–10 gauge) screws the PRO300 is a truly flexible tool to cater for a wide range of applications. Incorporating a precision countersink adjustment that produces consistent screw depth, combined with the auto-feed mechanism delivers fast, hassle-free driving on the jobsite.

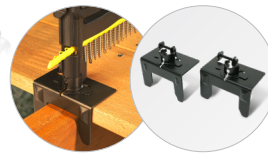

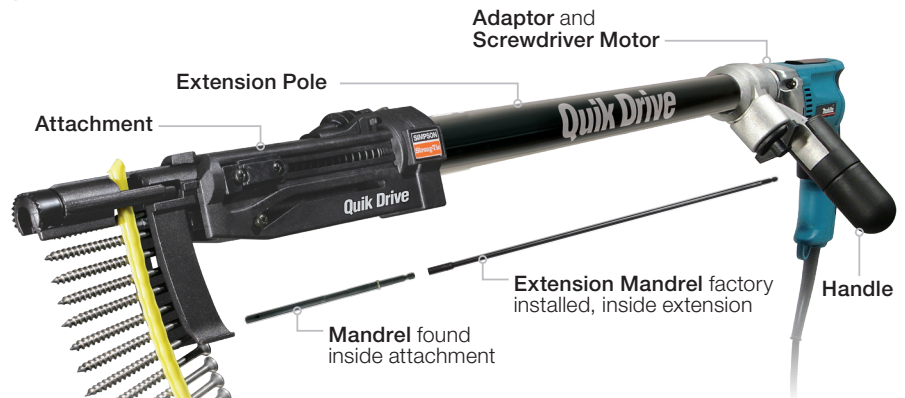

### Features & Benefits

- Expanded depth settings for high-density flooring materials
- Reversible and replaceable non-skid teeth
- Sure-grip guide tube increases stability for a wide range of screws
- Adjustable depth setting for perfect countersinking
- Rigid strip collation prevents jamming
- Extension Pole enables stand-up driving to save time and reduce worker fatigue
- Can be used with or without the Extension Pole
- QuikLock™ coupling allows for easy assembly and disassembly so system can be used without the Extension Pole
- Built-in bit wrench makes bit changes quick and easy

### PRO300SKA Includes

- PRO300 Attachment
- Extension Pole
- Rugged toolbox
- Adaptors: supplied to suit your power tool - 1 per attachment of your choice

For more adaptors, information on screwdriver motors and RPM recommendations per application, please visit our website or contact Simpson Strong-Tie.

**PDECKNC-RC** (sold separately)  
The decking nose clip positions the screw on the deck board and positions it over the joist for an easy, uniform installation from a standing position.

**Quik Drive®**
